Period tracker wonder app

I immediately started using it and it's way more than just a period tracker it helps you with your water intake, exercise, it helps you keep track of everything about your body as a woman and it even gives insight and tips to symptoms you may be having everyday, your able to track your weight, perform breast exam, it even has a way for you to connect with other women all over the world, pregnant moms or just get answers to questions you might be having, not only that but it can also help you have a healthier lifestyle too. Otherwise I love this app and the fact you get so much without having to pay is amazing and I looked through a few apps cause as someone who doesn't have much extra money right now it helps to be able to keep track of something that I can't avoid and I know you could do it on paper but I mean with it being on your phone it's so much more accessible and with you 24/7, if your like me, which means you can't forget it. Again, thank you for your feedback, and have a nice day. Only thing I've found I would want changed (after a few weeks of non period tracking use and the start of first one tracked) is being able to select multiple levels of flow. We'll be always at your service! Period & Pregnancy Tracker The developer, ABISHKING LIMITED., indicated that the app's privacy practices may include handling of data as described below. Hi, really appreciate your positive comment.
